Over C's Transport is living up to its name thanks to the latest in satellite tracking technology that makes pan-European deliveries efficient and cost-effective.

Key Benefit

“Saving over £400 a month on phone bills”

Mark Senior, Director, Over C's Ltd

For Successful Fleet Management

Key Benefits

Over C's Ltd

Decrease in Communication Costs

"Being able to pay a fixed price for tracking and communicating with drivers has enabled us to keep control of our communication costs more effectively. We have already made savings of £80 a month per vehicle."

Fixed Cost Tracking Throughout Europe

"Previously we were unable to give our customers accurate delivery times. Now with a fixed price solution from Navman Wireless, our vehicles are tracked throughout Europe as well as the UK. We have the peace of mind of knowing where our vehicles are, we used to play chess... now we play tracker."

Increased Customer Service

"Navman Wireless has provided us with the management tools to provide proof of service to our customers through accurate knowledge of where and when our drivers carried out their deliveries. We are also able to notify our customers as to how far away their deliveries are."

Increased Productivity

"Being able to keep track of every vehicle no matter where it is means that we are able to dispatch the nearest vehicle for every pickup. This saves us both time and money and ensures that we achieve the most out of our fleet and provide an efficient service to our customers."

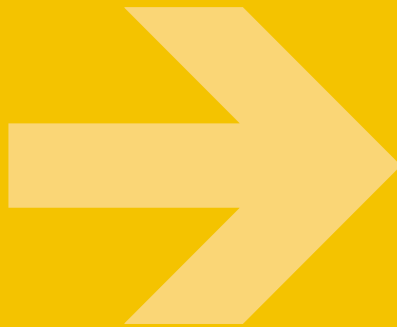

Electronic Time sheets

"As for any courier company, keeping track of time is almost as important as keeping track of drivers. OnLineAVL software now takes the hassle out of delivery reports, providing accurate time sheets in minutes."

"Continental control with no monthly financial surprises"

Mark Senior, Director, Over C's Ltd
